About Penguin Engineering

ENHANCING IDEAS, ENABLING GROWTH

The Penguin Innovative Engineering Company has been in existence since 1992 and is known for its innovative manufacturing that has brought about a lot of Automation in the food manufacturing industry. The young owner of the company joint Mr. Aakash Gajjar produced 101 fresh inventions as a student during his engineering days. A success story was made of his innovations, which he carried forward to his company with advanced engineering products, the company serves people with utility, ease, and effectiveness. Manufacturing units of this company ensure the food industry's basic hygiene needs. Its innovative products, excellent quality, and 24x7 customer support have set it apart from other companies starting out with just one employee and one product. Today, Penguin Engineering has more than 100 expert employees and a plethora of products. One constant is its innovation.

As hygiene is one of the major issues when it comes to street food, Penguin Engineering designed its automatic machines to be compact, easy to use, and hygienic. Other innovative products of the company, such as automatic mukhwas dispensers, Automatic tea machine, Automatic panipuri machines, Sugarcane machines, and Automatic bhel puri vending, are all equally useful and cost-effective. The company is the preferred option for its valued patrons due to its high-tech infrastructure, experienced professionals, strict quality standards, competitive prices, timely delivery, positive records, wide distribution network, and streamlined business operations. Several awards have been won by the company for its innovative products.
